University Honors
Dean's List: Fall 2013,
Fall 2014, Spring 2015
Eagle Scout

technical experience

2018–   **Microsoft Corporation,** Software Engineer II   *Redmond, WA*
- Delivered a crucial servicing update for Microsoft Edge, working with program manager, writing, and legal teams to protect user privacy.

2016–2018   **Microsoft Corporation,** Software Engineer   *Redmond, WA*
- Implemented top user requests in Microsoft Edge's downloads interface such as "Save As" and download speed data.
- Drove the development of new APIs to control window and tab behavior in Windows, alongside partner teams in the Windows shell and web platform.
- Developed new web APIs through a Typescript browser extension.

2015   **Microsoft Corporation,** Software Engineer Intern   *Redmond, WA*
- Designed and implemented an analytics tool which allows hierarchical search of XAML file structure using C# and SQL.
- Leveraged telemetry data to actively track the reliability of Windows Phone applications, leading to the discovery of a ship-blocking bug.

2013–2015   **CMU Biorobotics Lab,** Researcher for Dr. Howie Choset   *Pittsburgh, PA*
- Led a team of 3 students in planning and implementing firmware for JumpingBot, a robot which can self-stabilize in freefall.
- Designed and programmed an Android application which allows realtime sensor data to be accessed in MATLAB and ROS.

education

2013–2016   **Carnegie Mellon University**   *Pittsburgh, PA*
Bachelor of Science, Computer Science & Business Administration Minor
GPA: 3.63/4.00

selected projects

2017   **Edge Data Diff,** Microsoft Oneweek Hackathon   *Redmond, WA*
- With a team of six developers, created a browser extension that analyzes differences in online data by comparing HTML divs.
- Received the "Most customer centric" prize from the Data & Analytics team, and an honorable mention from the Microsoft Edge team.

2016   **fpga-trace,** 15-418 Parallel Computer Arch. & Programming   *Pittsburgh, PA*
- Implemented a ray-tracing renderer using an FPGA to perform highly parallel triangle-ray intersection tests.
- My method yielded a nearly 2x performance improvement and increased power efficiency versus a SIMD enabled CPU implementation.

2015–2016   **course-api,** Scottylabs   *Pittsburgh, PA*
- Developed a set of Python scripts that provide developers access to CMU course schedules, descriptions, and student evaluations.
