Game Design

technical experience

since 2016   **Microsoft Corporation,** Software Engineer   *Redmond, WA*
- Worked with product designers and program managers to improve Microsoft Edge's downloads interface.
- Quickly ramped up with a large codebase to deliver new features and fixes.

2015   **Microsoft Corporation,** Software Engineer Intern   *Redmond, WA*
- Designed and implemented an analytics tool which allows hierarchical search of XAML file structure using C# and SQL.
- Leveraged telemetry data to actively track the reliability of Windows Phone applications, leading to the discovery of a ship-blocking bug.

2013–2015   **CMU Biorobotics Lab,** Researcher for Dr. Howie Choset   *Pittsburgh, PA*
- Led a team of 3 students in planning and implementing firmware for JumpingBot, a robot which can self-stabilize in freefall.
- Designed and programmed an Android application which allows realtime sensor data to be accessed in MATLAB and ROS.

education

2013–2016   **Carnegie Mellon University**   *Pittsburgh, PA*
Bachelor of Science, Computer Science & Business Administration Minor
GPA: 3.63/4.00   **Dean's List**: Fall 2013, Fall 2014, Spring 2015

selected projects

2016   **fpga-trace,** 15-418 Parallel Computer Arch. & Programming   *Pittsburgh, PA*
- Implemented a ray-tracing renderer using an FPGA to perform highly parallel triangle-ray intersection tests.
- My method yielded a nearly 2x performance improvement and increased power efficiency versus a SIMD enabled CPU implementation.

2015–2016   **course-api,** Scottylabs   *Pittsburgh, PA*
- Developed a set of Python scripts that provide developers access to CMU course schedules, descriptions, and student evaluations.

2013   **CMUEats,** HackCMU   *Pittsburgh, PA*
- Wrote the backend for a web application that tracks the hours of CMU dining locations using Python, Django, and MongoDB – later ported to Node.js.
- A year later, the app maintained more than 400 daily hits from students.

other experience

2014–2016   **Scottylabs**   *Pittsburgh, PA*
- Helped to organize and operate Tartanhacks, a hackathon of 350 students from the Pittsburgh area.

2013   **Eagle Scout,** Boy Scouts of America   *Amherst, NH*
- Brainstormed, planned, and executed a service project that supplies used eyeglasses to developing countries. Over the course of the project, I raised more than $650 and managed 38 volunteers.
